PLAINTIFF'S MOTION TO DESIGNATE PORTIONS OF DR. KANSKAR'S DEPOSITION FOR USE AT TRIAL

MARKOLAW.COM

NOW COMES Plaintiff, **KOHCHISE JACKSON**, by and through his attorneys, **MARKO LAW**, **PLLC**, and for his Motion to Designate Portions of Dr. Kansakar's Deposition for Use at Trial, states as follows:

Pursuant to Fed. R. Civ. P 32 and Fed. R. Evid. 804, Plaintiff moves for an Order permitting him to use certain designated portions of Dr. Erina Kansakar's deposition transcript at trial, as she is located in Washington, more than 100 miles away from this Court.

Per Local Rule 7.1, Plaintiff's counsel sought concurrence regarding the relief at issue in this Motion. Defense counsel concurred with the designation of the deposition of Dr. Kansakar for use at trial. **Exhibit 1**, Concurrence Email.

WHEREFORE, for the reasons more fully set forth in the attached Brief, Plaintiff respectfully requests this Honorable Court grant Plaintiff's Motion to Designate Portions of Kansakar's Deposition for Use at Trial.

Respectfully submitted,

/s/ Jonathan R. Marko

CONCISE STATEMENT OF ISSUES PRESENTED

I. Whether this Honorable Court should permit Plaintiff to use certain designated portions of Dr. Kansakar's deposition transcript at trial.

Plaintiff states: Yes.

This Court should state: Yes.

ARKOLAW.COM

220 W. CONGRESS, 4TH FLOOR DETROIT, MI 48226

CONTROLLING OR MOST APPROPRIATE AUTHORITY

Federal Rules

Fed. R. Civ. P. 32

Fed. R. Evid. 804

Cases

U.S. v. Florence, No. 2:13-CV-00035, 2021 WL 5772340, (M.D. Tenn. Dec. 5, 2021)

LAW AND ARGUMENT

Plaintiff moves for an Order allowing it to admit in to evidence certain portions of the deposition transcript of Dr. Kansakar. Defendants have agreed to the designation of Dr. Kansakar's deposition transcript. **Ex. 1.**

Dr. Kansakar is an "unavailable" witness within the meaning of Fed. R. Civ. P. 32, and use of her deposition transcript is appropriate under Fed. R. Evid. 804.

In further support, Plaintiff states as follows:

On March 5, 2021, Plaintiff took the deposition of Dr. Erina Kansakar. On May 6, 2025, this Court issued its Amended Scheduling Order. ECF No. 119. Trial is currently set for August 18, 2025. *Id.* In preparation for trial, Plaintiff has identified Dr. Erina Kansakar as a potential witness. Dr. Kansakar is located in Washington, however, which is more than 100 miles from this Honorable Court. Plaintiff thus seeks to admit certain portions of her deposition testimony into evidence pursuant to the Federal Rules of Civil Procedure.

Fed. R. Civ. P. 32 governs the use of depositions at trial. *U.S. v. Florence*, No. 2:13-CV-00035, 2021 WL 5772340, at *3-4 (M.D. Tenn. Dec. 5, 2021).

In general, "all or part of a deposition may be used against a party on these conditions:

(A) the party was present or represented at the taking of the deposition or had reasonable notice of it;

- (B) it is used to the extent it would be admissible under the Federal Rules of Evidence if the deponent were present and testifying; and
- (C) the use is allowed by Rule 32(a)(2) through (8)."

Rule 32(a)(1). A party may use for any purpose the deposition of a witness if the court finds that:

(A) The witness is dead;

(B) The witness is more than 100 miles from the courthouse;

- (C) The deponent is unable to attend trial due to age, sickness, infirmity or imprisonment;
- (D) The party offering the deposition was unable to procure the deponent's attendance at trial by subpoena; or
- (E) Exceptional other circumstances exist.

See Fed. R. Civ. P. 32(a)(4) (emphasis added).

In addition, Fed. R. Evid. 804 allows for a hearsay exception when a witness is unavailable, but provided testimony at a deposition in the current proceeding. Fed. R. Evid. 804(a) and (b).

Defense counsel had reasonable notice of Dr. Kansakar's March 5, 2021 deposition.

Judge Stephen J. Murphy, III just yesterday – as of the date of writing – issued an order granting this exact relief under Fed. R. Civ. P. 32, allowing the

defendant in that case to designate portions of a doctor's deposition testimony for use at trial. **Exhibit 2**, Judge Murphy 7/7/2025 Order.

As Dr. Kansakar is located more than 100 miles from this Court and because the requirements of Fed. R. Civ. P. 32 and Fed. R. Evid 804 are met, Dr. Kansakar's prior deposition testimony is admissible. Plaintiff, therefore, requests that the Court allow Plaintiff to designate the following portions of Dr. Kansakar's deposition transcript for use at trial:

- Exhibit 3, Kansakar Dep. at 6:6-25
- *Id.* at 7:6-8
- *Id.* at 7:24-13:5
- *Id.* at 13:10-14:19
- *Id.* at 14:25-15:10
- *Id.* at 15:21-17:7
- *Id.* at 17:19-22
- *Id.* at 18:9-19:6
- *Id.* at 19:12-21
- *Id.* at 21:21-22:20
- *Id.* at 22:23-23:7
- *Id.* at 26:21-30:6

- *Id.* at 31:6-13
- *Id.* at 34:16-35:4
- *Id.* at 45:14-24
- *Id.* at 46:1-47:20
- *Id.* at 59:1-15
- *Id.* at 60:6-21
- *Id.* at 60:24-61:10
- *Id.* at 61:13-17

CONCLUSION

The designated portions of Dr. Kansakar's March 1, 2021 deposition are admissible as substantive evidence at trial. Dr. Kansakar is located further than 100 miles away from the courthouse, permitting the designation of deposition testimony in lieu of live testimony. Accordingly, Plaintiff respectfully requests that the Court enter an Order permitting him to use those designated portions of Dr. Kansakar's deposition testimony at trial.

Respectfully submitted,

/s/ Jonathan R. Marko

EXHIBIT 2

UNITED STATES DISTRICT COURT EASTERN DISTRICT OF MICHIGAN SOUTHERN DIVISION

$\Delta IMEE$	STURGII	Τ.
AHVITATA	OLUMATI.	11.1.

Case No. 2:22-cv-11837

Plaintiff,

HONORABLE STEPHEN J. MURPHY, III

v.

THE AMERICAN RED CROSS,

Defend	lant.	
		1

ORDER GRANTING MOTION TO DESIGNATE DAISY ANGELES' DEPOSITION FOR USE AT TRIAL [113]

The Red Cross moved to designate portions of Dr. Daisy Angeles's deposition for use at trial. ECF No. 113, PageID.3686. Sturgill opposed the request and argued that the Red Cross failed to show that Angeles was served or cannot appear, and that the deposition testimony is irrelevant. ECF No. 122, PageID.3965. The Court will grant the motion and state its disappointment with the parties' inability to resolve the simple dispute.

Federal Rule of Civil Procedure 32 addresses parties' use of depositions in court proceedings. Rule 32(a)(1) allows that a deposition may be used at trial against a party if:

- (A) the party was present or represented at the taking of the deposition or had reasonable notice of it;
- (B) it is used to the extent it would be admissible under the Federal Rules of Evidence if the deponent were present and testifying; and
- (C) the use is allowed by Rule 32(a)(2) through (8).

And Rule 32(a)(4) states that a "party may use for any purpose the deposition of a witness, whether or not a party, if the court finds . . . (B) that the witness is more than 100 miles from the place of hearing or trial or is outside the United States, unless it appears that the witness's absence was procured by the party offering the deposition." Here, Sturgill had reasonable notice of Angeles's deposition, ECF 113-1, PageID.3692, 3699, and defense counsel represented to the Court that Angeles is in Europe and will remain there until July 15. ECF No. 113.

Sturgill maintained that the Red Cross did not prove service of a trial subpoena on Angeles. Although true, Sturgill cited no law to explain why that failure is material. Rule 32(a)(4)(A)–(D) presents disjunctive options, and 32(a)(4)(B) is sufficient to authorize the use of the deposition here. At this late stage, the Court has no reason to doubt defense counsel's representation submitted in a signed filing governed by Federal Rule of Civil Procedure 11. If Plaintiff has actual evidence to suggest that defense counsel (or the witness) is being untruthful, the Court will address it.

Next, Sturgill suggested that the deposition transcript itself constitutes inadmissible hearsay. ECF No. 122, PageID.3967. Not so. Federal Rule of Evidence 802 notes that hearsay is not admissible *unless* a federal statute, the rules of evidence, or other federal rules provide otherwise. Civil Rule 32 is one of those "other federal rules." In fact, Rule 32 mandates that the Court treat the deposition as if it was in court testimony. So, the hearsay rules, in particular Evidence Rule 804's regulation of unavailable witnesses, governs not the deposition itself, but its content.

In other words, there is only one layer of hearsay in play and one hearsay inquiry: whether Angeles's deposition answers, if given in court, would constitute inadmissible hearsay. *Nationwide Life Ins. Co. v. Richards*, 541 F.3d 903, 914–15 (9th Cir. 2008) (collecting cases explaining the Rule 32 exception and Rule 804). Sturgill developed no argument on that question here, and the Court will address the concern at trial.

Last, Sturgill attacked the relevance of the deposition testimony. ECF No. 122, PageID.3969. She argued that, because the Red Cross did not rely on or ask for her medical history at the time of the accommodation denial, the evidence is irrelevant. Id. at 3696–3670. The Court observes that both parties have alluded, at different times and somewhat inconsistently (when beneficial to their positions) to the notion that the jury can consider only that evidence presented to or relied upon by Red Cross or the reasoning that the Red Cross employed at the time it made its accommodation decision. See, e.g., id. at PageID.3969–3970; ECF No. 118, PageID.3897; but see ECF No. 127, PageID.4024–4025, 4027 (recognizing the tension and arguing that evidence of sincerity is not limited to that presented to the employer during the accommodation process). The Court is aware of that type of principle in other discrimination contexts, but that principle is likely inapplicable here. See Mantolete v. Bolger, 767 F.2d 1416, 1424 (9th Cir. 1985) (holding that evidence not known to the employer could not support the "reasonableness" of its decision but could be relevant to showing whether employee was "qualified" under the ADA); Kluge v. Brownsburg Cmty. Sch. Corp., 64 F.4th 861, 888 (7th Cir. 2023) (rejecting consideration of evidence undermining the undue hardship posed by an accommodation because the evidence was not presented to the employer), vacated on denial of reh'g on other grounds, No. 21-2475, 2023 WL 4842324 (7th Cir. July 28, 2023); but see id. at 906 (Brennan, J., dissenting in part) (concluding opposite). Neither party presented authority that permissible evidence of every or any element of Sturgill's claim is so cabined.

Rather, jury instructions used in this district, see, e.g., Domski v. Blue Cross Blue Shield of Mich., 2:23-cv-12023 PageID.3981–3982 (E.D. Mich. November 12, 2024), and recitations of the elements of Sturgill's cause of action focus on, for example, the employee's sincerity and not the employer's perception of that sincerity. See, e.g., Sturgill v. Am. Red Cross, 114 F.4th 803, 808–09 (6th Cir. 2024) (noting that the prima facie case for failure to accommodate a religious belief requires showing that "(1) the employee holds a sincere religious belief that conflicts with an employment requirement; (2) the employee informed the employer about that conflict; and (3) the employer took an adverse employment action against the employee for failing to comply with the conflicting employment requirement"); Brown v. MGM Grand Casino, No. 2:22-cv-12978, 2024 WL 4819575, at *4 (E.D. Mich. Nov. 18, 2024). And to this point, there are likely relevant uses of the evidence. For example, the testimony could buttress or attack the sincerity of Sturgill's religious objection.

At this juncture, the Court will not conclude that the entirety of the medical deposition, including its discussion of Sturgill's bases for refusing certain medical treatments, is so wholly irrelevant as to warrant complete exclusion. *See* Fed. R. Evid. 401.

WHEREFORE, it is hereby ORDERED that Defendant's Motion [113] is GRANTED.

SO ORDERED.

s/ Stephen J. Murphy, III STEPHEN J. MURPHY, III United States District Judge

Pages 6..9

2 ERINA KANSAKAR, M.D., 2 A. Sure. I did my medical school at B.P. Koirala 3 having first been duly remotely sworn, was examined and Institute of Health Sciences in Dharan, Nepal. 4 testified on her oath as follows: 4 I came to the United States for my general 5 5 EXAMINATION BY MR. CROSS: surgical residency. That was from 2006 to 2012. 6 Q. Good morning, Doctor Kansakar. My name is Ian Cross. 6 After completing my general surgical I represent the plaintiff, Kohchise Jackson. residency, I did a fellowship in minimally invasive 7 7 8 8 Have you ever had your deposition taken surgery at Detroit Medical Center from 2012 to 2013. 9 before? 9 Q. What is a residency? 10 A. Yes. 10 A. Residency is training in a medical specialty in order to be able to practice that specialty. 11 Q. So you know that we need verbal responses, no head 12 nods, yes or no? 12 Q. And if I heard you correctly, your medical speciality 13 is general surgery? 13 A. Correct. 14 Q. And I just want to let you know if you don't 14 A. Correct. 15 understand any of my questions, that's fine. You can 15 Q. Are you currently practicing as a general surgeon? 16 ask me to clarify. 16 A. Yes, I am. 17 17 Q. How many years have you practiced general surgery? Also, this isn't an endurance test, so if 18 you need a break, if you want to go to the bathroom, 18 A. I've been in practice since August of 2013. 19 just let me know, okay? 19 Q. Continuously? 20 A. Yes. 20 A. Okay. 21 Q. So did you take the opportunity to review any 21 Q. Are you board certified? 22 records --22 A. Yes, I am a board certified general surgeon. 23 Q. Where did you work after your fellowship? 23 A. Yes. 24 Q. -- to prepare for this deposition? 24 A. After completion of my fellowship, I was at Port Huron 25 with Physician Healthcare Network. 25 A. Yes. I got a copy of the medical records, and I did Page 9 get a chance to review those records. 1 Q. And how long did you work there? 1 2 THE COURT REPORTER: Doctor, can you speak 2 A. I worked there until February of 2018. 3 up a little bit? You're soft spoken and it's a little 3 Q. While you were working in Port Huron, did you treat an 4 difficult. individual by the name of Kohchise Jackson? 5 5 A. Yes, I did. Okay. Thank you. 6 THE WITNESS: Yes, I did get a copy of all 6 Q. Do you recall what treatment, what condition you 7 the medical records, and I did get a chance to review provided Mr. Jackson treatment for? those medical records. 8 A. I remember Mr. Jackson, but I do not recall all the 8 9 BY MR. CROSS: details. 9 10 Q. Okay. 10 After reviewing the medical records, I 11 MR. SCARBER: I don't want to interrupt. 11 treated him for a complicated sigmoid diverticulitis. 12 Just is there any way we can get more light in the 12 Q. All right. I'm going to show you a document. I'm 13 room where the doctor is? 13 going to try to share the screen here. 14 THE WITNESS: Yeah. I'm at my home office 14 A. Sure. 15 15 Q. And I want you to look over the document. and --16 MR. SCARBER: I see. 16 Can you see it? 17 THE WITNESS: Let me see if I can open this 17 A. Yes. 18 Q. All right. And let me know when you're done reviewing 18 curtain to get some more light. 19 19 MR. SCARBER: Okay. I couldn't really see it and if you need me to scroll. 20 you. I can definitely hear you, so if that's the 20 And this has been marked as Plaintiff's Exhibit 1. 21 case, that's fine. 22 Oh, that's better actually. Thank you. 22 A. I'm okay with that. 23 BY MR. CROSS: 23 Q. Okay. Do you recognize this document? 24 A. Yes. 24 Q. Okay. So let's start with a little background, 25 O. What is it? 25 Doctor Kansakar. Can you give us an overview of your

Erina Kansakar

03/05/2021

Pages 10..13 Page 12

- 1 A. This is a procedure report. I did a colonoscopy for
- 2 Mr. Jackson.
- 3 Q. And I see down here in this findings section, you
- indicated he has a colovesical fistula, is that 4
- 5 correct?
- 6 A. Correct.
- 7 Q. What is a colovesical fistula?
- 8 A. So a colovesical fistula is a condition where there is
- abnormal communication between the colon and the
- 10 urinary bladder.
- 11 Q. What's a colon?
- 12 A. Colon is a part of the GI tract which is it was the
- 13 end of the gastrointestinal tract where the stool is
- 14 being formed and kind of sits there before somebody
- 15 kind of has a bowel movement.
- 16 Q. Okay. And I see above those findings in this
- 17 recommendation section, you recommended an open
- 18 sigmoid colectomy, is that correct?
- 19 A. Correct.
- 20 Q. What is an open sigmoid colectomy?
- 21 A. So the open sigmoid colectomy is a surgery where we
- 22 make an incision right in the middle to identify the
- 23 colon, usually the sigmoid colon which has a
- 24 communication with the bladder in this case, to resect
- 25 that portion of the colon, and that would be a sigmoid

- 1 the infected section of colon and connect the two ends
- 2 together?
- 3 A. Correct.
- 4 Q. Okay. What is an ostomy?
- 5 A. So ostomy is a procedure where we do not hook the
- patient's two ends of the colon together but bring a
- 7 bag through the abdominal wall so that the bowel --
- 8 excuse me -- the stool is rerouted into the bag, and
- 9 basically patient is having bowel movements into a
- 10 bag. It's a diversion.
- 11 Q. Why would you do a diversion like that, an ostomy,
- 12 rather than a primary anastomosis?
- 13 A. It depends upon the condition during the surgery, if
- 14 there is a lot of swelling or it would be called
- 15 edema, a lot of scar tissue.
- 16 There is a concern that putting the two 17 ends together would result in a potential leak. Then
- 18 it would be safer to do an ostomy or a diversion.
- 19 Q. Okay. And for Mr. Jackson, did you perform a primary
- 20 anastomosis?
- 21 A. No, I did not perform a primary anastomosis.
- 22 Q. Did you create an ostomy?
- 23 A. Yes, I did.
- 24 Q. Was that the first time you created an ostomy in your
- 25 career?

Page 13

- 1 colectomy.
- 2 Q. When you say communication with the bladder, what do
- 3 you mean by that?
- 4 A. That's an abnormal connection. Sigmoid colon, sigmoid
- 5 diverticulitis which this patient has is a condition
- 6 where the colon has these weak pouches or protrusions
- 7 through -- which are, like, weak points, and that can
- 8 get infected, as a result of which they can establish
- abscesses or pus pockets, or it could be complicated 9
- 10 and have communication with the adjacent organs like
- 11 the urinary bladder.
- 12 So when there is an abnormal connection
- 13 between the colon and the urinary bladder, it's called
- 14 a fistula.
- 15 Q. All right. Now, in the recommendations section, you
- 16 said: With primary anastomosis.
- 17 Am I pronouncing that correctly?
- 18 A. Correct.
- 19 Q. Possible ostomy.
- 20 What is primary anastomosis?
- 21 A. So primary anastomosis is doing a one-stage surgery
- 22 where the plan is to hook the patient back to
- 23 establish the natural route at the same time.
- 24 Q. So if I'm understanding you correctly, with primary
- anastomosis, you would do one surgery where you resect

- 1 A. No.
- 2 Q. About how many times have you created an ostomy?
- 3 A. I would be -- it would be very hard for me to kind of
- give a number, but I would say definitely close to a
- 5 hundred or more.
- 6 Q. A hundred or more times.
- 7 Have you ever --
- 8 MR. SCARBER: Just objection to the
- 9 timeframe. It hasn't been specified.
- 10 BY MR. CROSS:
- 11 Q. Have you ever reversed an ostomy?
- 12 A. Yes, I have.
- 13 Q. Do you know approximately how many times you performed
- 14 that procedure?
- 15 A. I do not recall a number just on top of my head. I'm
- 16 not able to give an exact number.
- 17 Q. But more than once I assume?
- 18 A. Absolutely more than once. More than, again, maybe
- 19 closer to a hundred or more.
- 20 Q. Okay. So after you created an ostomy for Mr. Jackson,
- 21 did you prescribe a plan of treatment?
- 22 A. Yes, I did.
- 23 Q. And did your prescribed plan of treatment include a
- 24 barium enema?
- 25 A. Correct.

Pages 14..17

- 1 Q. Why did the plan of treatment -- well, first, what is
- 2 a barium?
- 3 A. A barium enema is a radiological study where contrast
- 4 which is barium in this case is injected through the
- 5 rectum or the anal canal or the anal opening to kind
- 6 of see the anatomy of the rectum and give us idea
- 7 about the length that's available in the distal -- in
- 8 the remaining colon -- excuse me -- in the remaining
- 9 rectum.
- 10 Q. And why would you need to know that?
- 11 A. It helps with surgical planning to kind of get an idea
- 12 how much length is available distally to help with the
- 13 anastomosis or hooking the colon back up.
- 14 Sometimes it also helps to identify any
- 15 other abnormality like a mass or a growth.
- 16 Q. Did your prescribed plan of treatment include a
- 17 colostomy reversal surgery in February of 2017?
- 18 A. Yes, I did include that as my plan of treatment.
- 19 Q. Why did you include that in the plan of treatment?
- 20 MR. CORBET: Just for the record, leading
- 21 on these last couple or that earlier question. I was
- 22 trying to unmute it.
- 23 BY MR. CROSS:
- 24 Q. You may answer.
- 25 A. Okay. So my standard care for anybody that gets a
- 1 colostomy is to wait for about six to eight weeks.
- 2 The reason I wait for six to eight weeks is to reduce
- 3 any swelling or inflammation or edema from the surgery
- 4 so that the second surgery or colostomy takedown
- 5 becomes easier.
- 6 The goal is to establish the natural route
- 7 for the patient so that he or she can have natural
- 8 route to poop and have bowel movements.
- 9 Q. Did I hear you use the term standard of care just now?
- 10 A. This is my standard practice.
- 11 Q. Okay. Are you familiar with the term standard of
- 12 care?
- 13 MR. SCARBER: I'm just going to place an
- 14 objection to relevancy. This isn't a malpractice
- 15 case.
- 16 MR. CORBET: Join.
- 17 BY MR. CROSS:
- 18 Q. You may answer.
- 19 A. I'm sorry. I didn't get that question again.
- 20 Could you repeat that?
- 21 Q. Are you familiar with the term standard of care?
- 22 A. Yes, I am.
- 23 Q. What is the standard of -- what does that term mean?
- $24\,$ A. $\,$ To me it means what I would normally do in a
- 25 particular situation or a health condition.

- 1 Q. Okay. And I'm going to show you another document.
- 2 Can you see the document?
- 3 A. Yes.
- 4 Q. Do you recognize what it is?
- 5 A. Yes. I think this was a letter to kind of make a
- 6 request for approval for his colostomy reversal
- 7 surgery
- 8 Q. Okay. And is that your signature?
- 9 A. Yes, it is.
- 10 Q. Are you the author of this letter?
- 11 A. Yes.
- 12 Q. So you wrote: My recommendation and standard of care
- 13 for this patient is to have a barium enema x-ray via
- the distal rectal stump and a colostomy reversal?
- 15 A. Correct.
- 16 Q. Why did you recommend a colostomy reversal?
- 17 A. Colostomy is a diversion, and for this patient, it was
- 18 meant to be a temporary plan to let the infection
- 19 settle, and the original plan was to kind of hook him
- 20 back up. So that was the plan to do a colostomy
- 21 reversal.
- 22 Q. So were you able to follow your prescribed plan of
- 23 treatment for this patient?
- 24 A. I had plan for tentative surgery in February, but I
- 25 was told that his surgery was not approved. So I was

Page 17

- 1 not able to perform the second surgery for the
 - patient.

2

- 3 Q. Was there a medical reason the patient could not have
- 4 undergone the second surgery that you were aware of?
- 5 A. Not that I'm aware of. He did not have any other
- 6 medical conditions that I was aware that would make
- 7 him ineligible for surgery.
- 8 Q. So --
- 9 MR. CORBET: Just a relevance objection.
- 10 BY MR. CROSS:
- 11 Q. Would it be fair to say that your prescribed plan of
- 12 treatment was interfered with for a nonmedical reason?
- 13 MR. CORBET: Form and foundation.
- 14 MR. SCARBER: Leading.
- 15 MR. CORBET: Join.
- 16 BY MR. CROSS:
- 17 Q. You may answer.
- 18 A. I do not know that.
- 19 Q. Do you know who was responsible for approving or not
- 20 approving the colostomy reversal surgery that you
- 21 planned?
- 22 A. I do not know that.
- 23 Q. Okay. Let me go back to this exhibit. This has been
- 24 marked as Plaintiff's Exhibit 4.
- 25 MR. SCARBER: Ian, I don't want to

Pages 18..21

1 interrupt, but I got Exhibit 1, and that was her	1 How long do you need?
2 original note.	2 A. About five minutes.
3 But did we go through 2 and 3 already?	3 Q. Sure.
4 MR. CROSS: No, we haven't.	4 A. Thank you.
5 MR. SCARBER: Okay. I'm sorry. All right.	5 THE VIDEOGRAPHER: We are going off the
6 MR. CROSS: I skipped to 4.	6 record at 1:27 p.m.
7 MR. SCARBER: Okay. I thought I missed	7 (Off the record at 1:27 p.m.)
8 something.	8 (Back on the record at 1:33 p.m.)
9 BY MR. CROSS:	9 THE VIDEOGRAPHER: We are back on the
10 Q. Okay. And I'm going to draw your attention to this	10 record at 1:33 p.m.
11 last page here, this fax cover sheet.	11 BY MR. CROSS:
12 Do you see it says Hope Surgical Services	12 Q. Doctor Kansakar, I believe you testified before that
13 at the top? What is Hope Surgical Services, if you	13 you had performed at least dozens, perhaps a hundred
14 know?	14 colostomy reversal procedures in your career.
15 A. Hope Surgical Services was the surgical group or the	15 Do you currently treat patients with
16 surgical division of Physician Healthcare Network.	16 Medicare?
17 Q. And this person that faxed this from, Kathy, do you	17 A. Yes, I do.
18 know who that person is?	18 Q. Are you a participant in the Medicare program?
19 A. Kathy was my office manager at that time.	19 A. Currently I'm employed through CHI which is Franciscan
20 Q. Do you know her last name?	20 Health, Catholic Health Initiative, and I believe I am
21 A. I do not remember her last name right now.	21 a part of the Medicare provider, but I have to check
22 Q. Do you know any other information that would be useful	22 to verify that.
23 if we wanted to find Kathy to identify her?	23 Q. Have you ever performed a colostomy reversal procedure
24 A. I would contact Physical Healthcare Network.	24 for a Medicare recipient?
25 Q. And I see the fax is to a Colleen.	25 A. I haven't I do not check that to see if it's a

SCARBER: Do you ever place an ostomy with the intention that the ostomy be

25 Q. Sure.

knowing that that would be a permanent ostomy.

Pages 22..25

- 1 Q. And when would you do that?
- 2 A. There are certain medical conditions where there could
- 3 be tumor or cancer which is very low in the colon. It
- 4 may involve the sphincter that's responsible for the
- 5 continence or incontinence.
- 6 And if that is involved, then,
- 7 unfortunately, it would not be an option to hook the
- 8 colostomy back to any remnant there because that would
- 9 lead to incontinence.
- 10 Q. I see.
- 11 A. There could be certain medical conditions like
- 12 patients having very severe cardiac condition or lung
- 13 condition which would make another surgery very high
- 14 risk, and in those individuals, colostomy would be
- 15 permanent.
- 16 Q. So barring those situations, would you typically try
- 17 to reverse a colostomy at some point after you placed
- 18 it
- 19 A. Yes, that would be my recommendation to try and
- 20 reverse the colostomy.
- 21 MR. CORBET: Same objection.
- 22 BY MR. CROSS:
- 23 Q. And how long would you typically wait before reversing
- 24 the colostomy?
- 25 A. I typically wait between six to eight weeks from the
- 1 original surgery.
- 2 Q. Would there be a medical reason that you might wait,
- 3 say, five years?
- 4 MR. CORBET: Same objection.
- 5 THE WITNESS: Not to my knowledge.
- 6 MR. CROSS: Okay. I don't have further questions.
- 8 MR. CORBET: Devlin, would you like to go
- 9 first or would you like me to go first?
- 10 MR. SCARBER: You go ahead and I'll follow.
- 11 EXAMINATION BY MR. CORBET:
- 12 Q. Okay. Hi, Doctor Kansakar. My name is Dan Corbet.
- 13 I'm going to ask you a few follow-up questions, okay?
- 14 A. Sure.
- 15 Q. You said you remembered the name Kathy.
- 16 Was that your office manager from the
- 17 Port Huron office I believe?
- 18 A. Correct. She was our office manager at Hope Surgical
- 19 Services.
- 20 Q. And do you happen to remember a conversation with her
- 21 that about this patient in February of 2017?
- 22 A. No. It's been long, and I really do not remember any
- 23 other than what's in the medical records.
- $24\,$ Q. $\,$ And I don't blame you one bit. I wouldn't remember
- 25 something four years ago, either, that specific, and

- 1 that's why we have some records.
- 2 So I'm going to see if I can try to refresh
- 3 your recollection, okay?
- 4 A. Okay.
- 5 Q. Let me see if I can pull up a document here.
- 6 Doctor, can you see the note that I put up
- 7 on the screen?
- 8 A. Uh-huh, yes, I can.
- 9 Q. We can call this Defendant's Exhibit 1.
- 10 And do you see the date on the left-hand
- 11 side, it says February 1, 2017?
- 12 A. Okay. Yes, I do.
- 13 Q. And if we read the note, can you read it to yourself,
- 14 see if it will refresh your recollection?
- 15 A. Inmate's colostomy reversal is currently pending. Per
- 16 Doctor Kansakar's office manager, Kathy, the colostomy
- 17 reversal is not life threatening or emergent. When
- 18 Kathy was asked for a specific timeframe to have the
- 19 procedure completed per recommended standard of care,
- 20 she stated there is not a timeframe. It is not a
- 21 life-threatening condition. It is based on personal
- 22 comfort of the patient. Inmate's surgery will remain
- 23 postponed at this time. Will continue to assess and
- 24 monitor. Colleen Dwean.
- 25 Q. I'm sorry. Go ahead.

Okay. So does that refresh your

- 2 recollection of having a conversation with Kathy back
- 3 then?

1

- 4 A. No, it doesn't.
- 5 Q. Let me try another one.
- 6 Doctor, here's a note from the state
- 7 prison, and near the bottom of it, can you read -- can
- 8 you see my mouse?
- 9 A. Yes, I do.
- 10 Q. Can you read that, two sentences?
- 11 A. No urgent yeah. Okay. No urgent medical issues
- 12 were reported from the surgeon's office, and the
- 13 colostomy is functional. It is not likely that the
- 14 colostomy will be reversed in the MDOC.
- 15 Q. Now, do you see the date on this one?
- 16 A. That is March 29, 2017.
- 17 Q. All right. Where it talks about no urgent medical
- 18 issues were reported from the surgeon's office and the
- 19 colostomy is functional, do you happen to have a
- 20 recollection of maybe talking to either your office
- 21 manager or somebody about the patient back on or about
- 22 March 29, 2017?
- 23 A. No. When I reviewed the medical records, I think the
- 24 last office note was 1-10, and, unfortunately, I do
- 25 not have any other, you know, recollection of the

1

2 Q. Okay. So we'll call this one for the record

Defendants' Exhibit 2. Yeah, 2.

So, Doctor, let me try to refresh your

5 recollection with one more note. Doctor, let me get

the date of this thing. So here's another note from

7 the state prison.

Can you read the date of that for us?

9 A. It's 4-7, 2017.

10 Q. Okay. And the only place it mentions surgeon is --

11 can you see where my mouse is and start reading there,

12 just that sentence?

13 A. No medical necessity per outside documentation or

14 from conversation with surgeon's office,

15 Doctor Kansakar.

16 Q. So does this refresh your recollection that maybe you

had a conversation with somebody either from the state 17

prison or in your office? 18

19 A. Unfortunately, I do not.

20 Q. Okay. Nobody expects you to. This is four years ago.

So if Kathy had come to you either in

22 February, March, or April and asked you is the

23 reversal of the colostomy medically necessary, would

it be correct to say that you may have told her it's

24 25 not medically necessary, it's more for the preference

10

17

1

1 of the patient, is that fair?

2 A. I cannot say that for sure because in my mind, you

3 know, I want the natural route to be established for

4 the patient.

5 Q. Certainly.

But if you were asked is this more for the preference of the patient or is this a medically necessary procedure, would it be your custom, habit, and procedure if you were asked that question at that time that you may have said, yes, it is more for the preference of the patient than required as a medical necessity?

MR. CROSS: Objection, calls for

14 speculation.

15 BY MR. CORBET:

16 Q. Do you remember the question, Doctor?

17 A. Could you repeat that again?

18 Q. Sure. If you had talked to somebody in your office,

19 possibly Kathy, in January -- I'm sorry -- in

20 February, March, or April of 2017 and she told you

21 that the jail or the prison had called and wanted to

22 know if this is a medically necessary procedure to

23 reverse the colostomy, is it possible you may have

24 said, well, it's more for the preference of the

25 patient, it's not technically a medically necessary procedure. Based on your custom, habit, and practice,

2 would you have said something along those lines to

3 Kathy?

4 A. I do not know that. Usually my answer would be it's a

5 lifestyle-altering procedure for the patient, and

6 it's - it would be very normal for the patient to

7 have a natural route established.

8 I would recommend colostomy reversal. The

9 timeframe is usually after the initial six to eight

10 weeks' window. It's not, it's not definite, like,

when I would do it, but, you know, I would prefer to

12 do it within, within some reasonable time as long as

the initial six to eight weeks is over, and it could

14 depend upon, you know, surgeon's availability or

15 operating room availability and patient's time

preference. 16

17 Q. If Kathy had told these -- the persons that called

from either the jail and/or the prison, had told them 18

19 that it was a preference as opposed to a medical

20 necessity, would she have been in error doing that?

21 A. I do not know if she said that, so I cannot answer

22 that question.

23 Q. Well, I'm allowed to ask you hypotheticals, and I'm

24 going based on these notes in the chart here, and I

25 showed you three notes.

Page 29

If Kathy had actually said something along

2 those lines that it's not medically necessary

3 according to Doctor Kansakar, it's more of a lifestyle

4 preference, are you saying she was in error telling

5 that to the jail person?

6 A. No, it's not a life-threatening situation. As I said,

it's more of a quality of life.

8 Q. Okay. And the term I used was medically necessary I

9 think at one point in time because I think I saw that

in one of the notes, so let me use that term again.

11 If Kathy had told someone from the jail or

12 someone from the prison that the reversal of the 13 colostomy was a lifestyle preference as opposed to

14 medically necessary, would Kathy have told us -- told

15 them something that was incorrect?

16 A. I -- again, it's when you say about medical necessity,

it also depends upon, like, the psychological

18 well-being of a person.

19 So if I was a, if I was a patient, I was,

20 you know, I believe he was thirty-four or thirty-five

21 at that time, and I did not have any other medical

22 conditions which would prohibit me from getting a

23 surgery, I would like to have my normal anatomy

24 established so that, you know, I don't have to have a

bag which can potentially leak and cause a problem

hansonreporting.com 313.567.8100

25

Pages 30..33

and, you know, potential embarrassment. 2 So I would say if you consider the medical 3 well-being of the person both, like, for psychological 4 well-being, for being - feeling well in general, I 5 think having a colostomy reversal would be much more 6 preferred than having a colostomy.

7 MR. CORBET: For the record, motion to 8 strike as being way over what I asked.

9 BY MR. CORBET:

8

9

10

10 Q. Doctor, my question was a little bit shorter and simpler. If Kathy had told somebody from the jail who 11 12 called or somebody from the prison who called that the 13 reversal of the colostomy was a lifestyle preference

14 as opposed to a medical necessary procedure, would she

15 have been incorrect to tell them that?

16 MR. CROSS: Objection, asked and answered. 17 But you can answer. 18 THE WITNESS: Well, I do not, I do not know

that answer, you know. Yes, as I said, it's something that would be - it's not a life-threatening condition.

If she had said that, again, it's a hypothetical scenario, and I would prefer not to answer hypothetical questions, especially when I wasn't the one who gave that answer.

Page 31

1

1 BY MR. CORBET:

2 Q. Right, but we're allowed to ask you hypothetical 3 questions, and we'll get a chance to ask Kathy 4 questions and try to connect the dots. 5

But at this moment, I still need to ask you that question. Would that have been something incorrect for Kathy to have told the jail or prison or whoever called and talked to her that the reversal was not medically necessary but it is a lifestyle preference?

11 A. I think I would say it is medically necessary to have 12 the colostomy reversed for the general well-being of 13 the patient.

14 Q. And is there a time limit on when you think that --15 strike that.

16 MR. CORBET: I'm going to move to strike 17 that answer.

18 BY MR. CROSS:

19 Q. Would Doctor -- Doctor, would Kathy have been 20 incorrect, though, if she told that to the jail

21 person?

22 MR. CROSS: Objection, asked and answered.

23 BY MR. CORBET:

24 Q. You can answer the question. Would Kathy have been 25 incorrect to tell that to the jail person that this

1 was not medically necessary, it was a lifestyle

2 preference?

3 A. I think I would agree with the first part which says

4 it's not medically necessary, but I do not agree with

5 just the second part that it's just a lifestyle

6 preference. It's for the mental and, you know,

7 psychological well-being to have a normal colostomy, I

8 mean colostomy reversed and having a natural route

9 reestablished.

10 MR. CORBET: Okay. Thank you. That's all

11 I have.

12 EXAMINATION BY MR. SCARBER:

13 Q. Good afternoon again, Doctor Kansakar. Devlin Scarber

appearing on behalf of the Corizon defendants, the 14

15 individuals at the -- who provided health care at the

16 Michigan Department of Corrections prison.

17 A. Good afternoon.

18 Q. I think I mentioned during our break, if you'd be kind

19 enough to provide Mr. Oswald with a copy of your CV, I

20 guess what we also call a resume, that would be great,

21 and he can get that over to us probably shortly after

22 you provide it to him, and that will give us a little

23 bit more information about your background.

24 A. That would not be a problem.

25 Q. Okay. So thank you. I sure would appreciate that.

Page 33

I'm just going to follow up on the last couple of exhibits that the plaintiff -- I'm sorry --

2 3 that Mr. Corbet asked you about with respect to those

4 documentations from Kathy who was -- who you indicated

5 was your office manager. And we discussed the fact

6 that it's -- it was over -- it was four years ago when

7 these conversations or notes took place.

8 Is it fair to say that you're not saying

9 those conversations didn't happen; you're just saying

10 that you can't recall that at this point because now

11 it's four years later?

12 A. I agree.

13 Q. Okay.

14 A. It's been four years, and I do not have the

15 recollection of all the conversations I've had.

16 Q. So it could have happened, it couldn't have happened,

17 you just don't remember at this point, right?

18 A. Yes, sir.

19 Q. Okay. And with respect to the documentation that was,

20 that was done by the jail health care staff as well as

21 the prison health care staff, they got documentation

22 about a conversation that took place.

23 And as far as you know, you don't have any

24 documentation about that, correct?

25 A. Yeah. The last -- this is the first time when it was

Erina Kansakar 03/05/2021 Page 34

3

6

Pages 34..37

- 1 shown here at the exhibit that I have seen those two
- 2 documents.
- 3 Q. Right.
- 4 A. The only communication that I had from my side is the
- 5 note that was a typewritten note on Hope Surgical
- 6 letterhead from January 24th, and that's all I have in
- writing as my reference. 7
- 8 Q. Okay. So the answer to my question would probably be
- 9 correct then. It's fair to say that you have no
- documentation regarding anything that would dispute 10
- 11 you having such conversations or your office having
- 12 conversations with the jail on January or -- I'm
- 13 sorry -- February 1st of 2017 and again with the
- 14 prison health care professionals on March 29, on or
- 15 around March 29th, 2017, or April 7th, 2017, correct?

16 A. Correct.

- 17 Q. Now, when you performed your original surgery on
- Mr. Jackson back in December of 2016, would you 18
- 19 consider that that surgery was medically emergent, it
- was absolutely necessary that you had to perform that 20
- surgery immediately for his well-being? 21

22 A. Yes. I agree that he needed that surgery sooner than

- 23
- 24 Q. And he needed it as soon as possible, correct?
- 25 A. Yes, because he was having -- from what I understand, Page 35

he had a communication or a fistula between his colon

- 1 2 and the bladder, as a result of which the stool was
- 3 leaking into the bladder, and he was having urinary
- 4 tract infection.
- 5 Q. And when you performed that particular procedure on
- 6 him on December 10th of 2016, there were risks
- 7 associated with that procedure, right, even though it
- 8 was an emergency kind of situation or a medically
- necessary kind of situation, right? 9

10 A. Could you repeat that question, please?

- 11 Q. When you performed that colostomy surgery that you
- performed on him back in December 10th of 2016, there 12
- 13 were risks and complications that could have resulted
- 14 from that surgery even though he needed it. There
- 15 were risks that were facing him potentially, correct?

16 A. Correct.

- 17 Q. And you advised him of those risks, correct?
- 18 A. I think that was that would be part of my
- discussion with him. 19
- 20 Q. Okay. Let me move around a little bit here, Doctor.
- I apologize. If there's a delay on my end, it's 21
- 22 because I'm trying to use my screen that's not
- 23 necessarily connected to my computer. I'm on a cloud,
- 24 so give me a minute. If there are any delays, I
- 25 apologize in advance here because I've got to do

- 1 scrolling.
- 2 MR. CORBET: Devlin, is any of the records
 - I had up there do you want me to pop up for you?
- 4 MR. SCARBER: No, no. I've got some other
- 5 stuff.
 - MR. CORBET: All right. No problem.
- 7 MR. SCARBER: And I'm getting it together.
- 8 I think once I get rolling, I'll be good.

9 BY MR. SCARBER:

- 10 Q. Doctor, are you able to see this note on the screen?
- 11 A. Yes, I do.
- 12 Q. Okay. And this is explaining the risk of anesthesia.
- 13 Now, I understand you performed -- what was
- 14 that surgery you performed on him on December the 10th
- 15 of 2016? What was the name of that?

16 A. It's called a sigmoid colectomy.

- 17 Q. Okay. And there are risks associated with that
- particular procedure, correct?
- 19 A. Correct.
- 20 Q. And I've just highlighted one of the risks, and one of
- 21 the risks is anesthesia, correct?
- 22 A. Correct.
- 23 Q. And are you able to see this on your screen again?
- 24 A. Yes.
- 25 Q. Okay. And I think it indicates here that some of
- those complications with anesthesia are possibility of 1
- 2 infection, bleeding, drug reaction, blood clots, loss
- 3 of sensation, loss of limb function, paralysis,
- 4 stroke, brain damage, heart attack, and death.
- 5 Did I just read those correctly?
- 6 A. Yes.
- 7 Q. And those are the things that are explained to the
- patient before he has a procedure like that, right? 8
- 10 Q. And that's just with anesthesia, but there's also
- risks just associated with the surgery, period, and 11
- 12 here it indicates that -- are you able to see my
- 13 screen?
- 14 A. Yes, sir.
- 15 Q. Here it indicates that these operations and procedures
- 16 carry the risk of unsuccessful results, complications,
- 17 injury, or even death.
- 18 That's correct, right?
- 19 A. Yes, sir.
- 20 Q. And those are possibilities that can happen with these
- 21 surgeries, correct?
- 22 A. Yes, sir.
- 23 Q. And, in fact, you're so concerned about those
- 24 particular type of things occurring that you actually
- 25 have the patient sign an informed consent indicating

6

Pages 38..41 Page 40

1 that he's aware that those things could happen, right?

2 A. Yes.

8

- 3 Q. Give me one second here. In a perfect world, I would
- 4 have just photocopied each page and just had it
- 5 simpler so I didn't have to do all this scrolling.
- 6 I think I'm on your operative report, but I
- 7 want to go to a specific page here.
 - Now, this is from your operative report in
- 9 December of 2016, and can you see what I've kind of
- 10 highlighted right there?

11 A. Yes, sir.

- 12 Q. And it indicates that even in your -- not just the
- 13 hospital forms that the patient signed but it also
- 14 appears that even in your operative report, you double
- 15 document that you explained the risks and dangers
- 16 associated with the procedure that you performed,
- 17 correct?

18 A. Yes, sir.

- 19 Q. And you indicate here that the risks and potential
- 20 complications could be bleeding, infection,
- 21 inadvertent urethral injury. Patient elected to
- 22 undergo an open sigmoid colectomy but not before you
- 23 put in here what the risk could be, right?

24 A. I'm sorry. Could you explain -- restate the question?

25 Q. Yeah. You explained these risks to him, correct?

- 1 A. Yes, I did. 2 Q. All right. And before you would perform this surgery,
- he had to understand these risks and be aware that 3
- these things could happen, correct?

5 A. Yes. That would be part of my practice to explain

- 6 that to my patients.
- 7 Q. And you're not just making this stuff up, right?
- Something has told you that these things can happen,
- and that's why you're informing them, right? 9

10 A. Yes, sir.

- 11 Q. Now, I understand that you indicated that you had a
- 12 plan to -- you had established a plan of care for
- 13 Mr. Jackson, and I understand that that was based upon
- 14 certain things that you wanted to do, particularly in
- 15 your practice, correct?

16 A. Yes, that's correct.

- 17 Q. As per what your practice is, right?
- 18 A. Correct.
- 19 Q. Not anybody else's practice but per what your practice
- 20 is, right?
- 21 A. I do not know about other's practice, but that's how I
- 22 was trained to wait for about six to eight weeks to
- 23 minimize any swelling and infection and then put the
- 24 patient or put the colostomy back together.
- 25 Q. And I'm just going back to your testimony as well as

- 1 your letter, and your testimony was very clear when we
- 2 started this deposition that it's your practice to do
- 3 that. Your letter even said my practice or my
- 4 standard is to do that.

5 You're talking about -- what you're talking

about is what you do, correct, not necessarily what

7 everybody else does, right?

8 A. Yes, sir.

9 Q. Okay.

10 MR. CROSS: Objection, mischaracterizes the

- 11 exhibit.
- 12 BY MR. SCARBER:
- 13 Q. And, in fact, when you -- I've got to ask you, do you
- 14 have a chart in front of you?

15 A. Patient's chart, yes, the medical records.

- 16 Q. Okay. And what exactly do you have in front of you?
- 17 Is that something that you got from the medical
- 18 office, or what do you have in front of you?

19 A. So I have my office notes, the operative report, and I

- 20 have a letter that was written on the Hope Surgical
- 21 Services letterhead dated January 24th and then a
- 22 handwritten note dated 12-27.
- 23 Q. Okay. So let's go to your -- do you have your records
- 24 from your post-op records where you treated
- 25 Mr. Jackson?

Page 41

1 A. Yes, I have access to my post-op records when I saw

him after surgery.

- 3 Q. Okay. So the first time you saw Mr. Jackson after
- surgery, would that have been December 27th, 2016?

5 A. Let me check real quick.

Yes, December 27, 2016. 6

- 7 Q. Okay. Is this your record here?
- 8 A. Yes.
- 9 Q. Okay. This should be -- this is probably what you
- 10 have in front of you.
- 11 I know we've got three attorneys here, and
- 12 I think we've all gotten records, and some of them
- 13 might -- I think they all say the same thing on them,
- 14 but maybe they've got a line or two here that's
- 15 different or one line is on page five instead of page
- 16 six. I don't know how they print them out, but I
- 17 think we've got the same documents here.
- 18 So this is your December 27th visit in
- 2016. 19

20 A. Uh-huh. Yes, sir.

- 21 Q. And you note that his ostomy is pink and productive,
- 22 right?

23 A. Correct.

- 24 Q. And I seem to remember that they talked about -- this
- 25 is based upon prior, prior experience I've got with

Pages 42..45

- colostomies, but there's, like, three Ps in ostomy 1
- 2 care, right? Have you ever heard that?
- 3 A. The three Ps? I'm not quite sure, sir.
- 4 Q. Pink, patent, and productive.
- 5 A. Okay. Yes.
- 6 Q. It doesn't matter. If you haven't heard of it, you
- 7 haven't heard of it.
- 8 But you say it's pink and productive,
- 9 right?
- 10 A. Correct.
- 11 Q. And it's got no problems and no problems with
- 12 functioning, right?
- 13 A. Not according to my note.
- 14 Q. And you've got written in here no new complaints,
- 15 right?
- 16 A. Correct.
- 17 Q. That means the patient wasn't complaining to you about
- anything, right? 18
- 19 A. No new complaints at that point, correct.
- 20 Q. All right. Functional colostomy, correct?
- 21 A. Correct.
- 22 Q. You see him again on 1-10, January 10, 2017, right?
- 23 A. Yes, that was my office note from January 10, 2017.
- 24 Q. When you see him on January 10th, 2017, his colostomy
- 25 was functioning fine, right?

- 1 O. You certainly didn't document anything like that,
- right?
- 3 A. Correct. Again, I did not document that.
- 4 Q. And that, I mean, concerns that are important that you
- get from a patient you document, right?
- 6 A. Yes.
- 7 Q. Okay. And this was the last visit that you actually
- saw Mr. Jackson, January 10th, 2017, correct?
- 9 A. Yeah. That's the last note I have from the medical
- records, so I believe that's the last time I saw him. 10
- 11 Q. And I know you had indicated a plan, you know, your
- 12 plan that you wanted to do or were anticipating doing
- 13 a reversal, but I didn't see any note where you
- specifically explained anything about a reversal to 14
- 15 Mr. Jackson.
- 16 A. I think there was a handwritten note from
- December 7 -- excuse me -- December 27th which laid 17
- 18 out a plan for surgery. It's a handwritten note on my
- 19 office letterhead. That was part of my - of the
- medical records that was given to me. 20
- 21 Q. Did you discuss anything with him on January 10th, the
- 22 next time you saw him?
- 23 A. I do not know that, sir, because it's not in my
- 24 medical records, and I do not remember what happened
- 25 on that day.

Page 43 Page 45

- 1 A. Yeah. It says colostomy was pink and productive.
- 2 Q. Even -- he was even -- even when you did a, you did a 3 physical examination on him, he was able to stand and
- 4 walk properly, correct?
- 5 A. Yes, I believe so. It doesn't as per my note,
- 6 there was nothing that says he wasn't able to walk.
- 7 Q. And at that point he was not having any issues that
- 8 you recorded in your report, correct?
- 9 A. Correct. As per my note, you know, pain was well
- 10 controlled, and some drainage was noted from the
- 11 incision.
- 12 Q. Is there anything indicating here that his colostomy
- 13 was not functional?
- 14 A. No, sir.
- 15 Q. All right. In fact, you said it was, right?
- 16 A. Correct.
- 17 Q. Is there anything in here, Doctor, where you have
- 18 anything noted about this particular patient
- 19 complaining about he wants a reversal or he absolutely
- 20 has to have a reversal and he's discussing that with
- 21 you and discussing anything in detail about how this
- 22 is affecting him and all that kind of stuff? I didn't
- 23 see anything, but you tell me. Is there anything in
- 24 here?
- 25 A. Not that I can see.

- 1 Q. Okay. And the note you're referencing from
- 2 December 27th on your letterhead, is that a discussion
- 3 you had with Mr. Jackson, or is that just some notes
- 4 that you had written down about a potential plan?
- 5 A. No. This is what I discussed with the patient I
- 6 believe. This is, you know, this is a documentation.
- 7 So I'm very much sure that I discussed this with the
- 8 patient.
- 9 Q. But nothing on January 10th, the last time you saw
- 10 him?
- 11 A. Yeah. I don't see any, like, repetition of those
- 12 reports. I do see that, you know, there's a colostomy
- 13 reversal planned for February 9th.
- 14 Q. Okay. This, this colostomy reversal plan for February
- 15 9th of 2017, was that a date? Who picked that date?
- 16 How did that date even come about, do you know?
- 17 A. The index surgery or the first surgery was on 12-10 I
- 18 believe, and, again, after the surgery is done, I wait
- 19 about six to eight weeks to let all the infection, the
- 20 inflammation, swelling, scarring to settle down.
- 21 So eight weeks from that would put us in
 - February, and that's how I chose that tentative date
- 22 23 to -- depending upon my schedule, the OR availability
- 24 to choose a date.
- 25 Q. Okay. I got it. I think I understand this.

1

7

16

Pages 46..49

- 1 So this date you put in here was really 2 just some calculation that you had from the time you 3 had done the original surgery, right?
- 4 A. So, yes. Again, I would generally wait for six to 5 eight weeks after this kind of surgery to start to do the second surgery because trying to go any time 6 7 earlier than that would cause a lot of swelling and 8 potentially more harm than or injury because of the, 9 you know, the adhesions or scar tissues.

So six to eight weeks' time, make sure that the scars are not as bad, and second surgery is going to be done more easier.

13 Q. Right.

10

11

12

14

15

16

17

18

19

And I think I'm just asking you, though, and you might have answered it, but just my simple question is this date is a date it sounds like that you just selected based upon your calculation of when he would heal and when you thought he could do a surgery, right?

20 A. Correct.

- 21 Q. Okay. You never spoke with the individual health care
- 22 professionals at the Michigan Department of
- 23 Corrections about this or Corizon or any of the health
- 24 care professions there, correct?

25 A. I do not recall.

Page 47

- 1 Q. Well, let me just tell you this. He wasn't even in
- 2 prison at that time in February 9th, 2017. He wasn't
- 3 even there yet, so you obviously didn't discuss this
- with them, correct? 4
- 5 A. I don't think so, sir, but I do not have any notes to
- 6 refer to that. So I do not know the answer to that.
- 7 I don't recall any conversations.
- 8 Q. So assuming that he doesn't even get to the Michigan
- 9 Department of Corrections until March, late March of
- 2017, then you would agree that this was never a plan 10
- 11 that you communicated to the health care professionals
- at the prison, right, assuming that he wasn't even 12
- 13 there yet, correct?
- 14 A. I do not know, like, how, how or where he was housed 15 during this time, you know.

16 I kind of laid out my plan as per the 17 medical records, you know. Everything that I did is 18 in the medical records, and, you know, the plan was to 19 do a colostomy reversal with a tentative date of 20 February 9th.

- 21 Q. Doctor, I don't want to interrupt you, but I think you
- 22 might have almost answered my question but not quite
- 23 answered it, and I don't want to cut you off because I
- 24 think I got the response to the end of your answer
- 25 there already.

- But my question is assuming that
- 2 Mr. Jackson was not even in prison in February of
- 3 2017, then this particular date that you came up with
- 4 in December or January is obviously not something that
- 5 you could have discussed with him because he wasn't 6
 - even there yet.
 - You would agree with that, right?

8 A. I'm sorry. I don't think I understand the

- 9 hypothetical situation.
- 10 Q. The hypothetical is you apparently wrote a note in your record indicating a reversal for February 9th of 11 12 2017.
- 13 Now, if Mr. Jackson was not even in prison 14 until after March of 2017, then you would agree that 15 you never discussed the February 9th, 2017, date with
- 17 A. Yeah. If he wasn't in the prison, then I guess, like,

the prison? It's just a simple question.

- 18 I wouldn't have discussed that.
- 19 O. Okav.
- 20 A. It could be any other, like, a patient who would come
- 21 to my office, and I would discuss the plan with the
- 22 patient.
- 23 Q. Okay. Now, we know that Mr. Jackson ultimately
- 24 underwent a reversal surgery on June 9th, June 19th of
- 25 2019.

2

Page 49

- 1 My question for you is did you ever discuss
 - any of the risks and complications that could arise
 - 3 from a reversal surgery with Mr. Jackson?
 - 4 A. I believe I did, but, again, I'll have to refer to my
 - 5 notes, and I do not recall, like, anything in
 - 6 particular.
 - 7 Q. Do your notes indicate that just like your prior notes
 - 8 from the hospital where you were telling him, you
 - 9 know, that you were going to proceed with the surgery
 - 10 and you discussed the risks, benefits, and
 - 11 complications of the procedure for the procedure that
 - 12 occurred in December.

13 Do your notes in any way from the Hope

- 14 Surgical Services or anyplace you saw him as far as
- 15 you know indicate that you had such discussions with
- 16
- him for a potential reversal surgery in February of 17 2017?
- 18 A. Yes, there is a date mentioned that there is, you
- 19 know, that's the tentative date for surgery, and I
- 20 believe it mentions in my operative report that I had
- 21 the discussion, but I may not have documented that in
- 22 my office note.
- 23 Q. Well, let me -- my question might have been confusing.
- 24 You never got to the -- there was never a reversal
- 25 surgery done by you in February, so there is no

10 A. Yes.

14 A. Yes.

answering.

5 BY MR. SCARBER:

Pages 50..53

MR. CROSS: Let her answer the question.

MR. SCARBER: But it was an improper

question, and that's why she's having trouble

6 Q. What I should say is as of January 10th, 2017, when you last saw him, there was still things you were

11 Q. Okay. And it's my understanding that with reversal surgeries, there is also significant risk, right, with

15 O. And, in fact, when he had his surgery done in June of 2019, it looks like some of that stuff is discussed.

Here's the operative report from the doctor who

here, it says: The patient was made aware of risks

infection, the potential need for reoperation and the

genitourinary system. I probably pronounced that word

and benefits of the procedure, including but not

limited to the risk of heart attack, stroke, death,

potential for a leak or potential for damage to

surrounding structures including the ureter and

performed the reversal surgery, and I have highlighted

colostomy reversal surgeries?

waiting on in terms of the final workup before you

actually would have performed the surgery, correct?

•		11 (1)
1	operative report	regarding that.

2 What I want to know is if any of your 3 office notes where you saw him specifically discuss 4 the risks and complications that could arise from a 5 reversal surgery.

6 A. There's no documentation that I can see in my notes.

- 7 Q. And if you were -- when you get ready to perform a
- surgery, you actually do document that in your notes,
- 9 right? Because I saw one in the December 2016 notes.
- 10 A. Yes, but, yes, that's true, I would have documented,
- but probably it could be that I was waiting or
- 12 anticipating another meeting, office meeting with him
- 13 just, like, closer to the surgery date to kind of go
- 14 over the instructions again, to explain everything in
- 15 detail. So that could have been a potential plan.
- 16 Q. Right.

17

18

19

20

21

25

1

2

3

4

5

6

7

13

So I guess what I'm saying is although you had planned to do a surgery, you didn't really complete all of the normal protocols that you would have actually done in order to actually definitively say that that surgery was going to happen, correct?

22 A. Well, I had plan for sure. I had, you know, surgical

had, you know, plan for him to drink the prep for the

scrubs, special soap scrub. So I was kind of -- I had

done my part in terms of preparing for the second

- 23 date chosen. So I would say I had, like, a plan for
- 24 colostomy reversal.

surgery.

I had -- as per my note, I had mentioned

colostomy reversal at 7:00 a.m. the day before

surgery. I had instructed him to use, like, bath

- that he needs antibiotics one day before surgery. I
 - 1 wrong.
 - But do you see that?
 - 3 A. Yes, sir.
 - 4 Q. And these are real things that can occur, correct?
 - 5 A. Yes, sir.

10 A. Yes, sir.

- 6 Q. And that's why the doctors explain these things to the 7
 - patient before they perform these procedures, right,
- 8 so that they're aware that these are things and
- 9 complications and risks that can occur, right?

11 Q. Now, it also notes in this record, it indicates that

the doctor is recognizing the fact that you performed

exploratory laparotomy with sigmoid colectomy and

Hartmann's procedure. It indicates that the urologist

a procedure on him on December 10th, 2016, your

9 things that you would normally do if you were going to 10 perform a surgery, correct?

8 Q. But you hadn't gotten around to doing all of the

11 For instance, we don't have any 12

documentation of you actually discussing the risks and complications and benefits of the procedure like we

14 have in your previous records, and you also wanted a

15 barium enema to be done.

16 So you were still waiting on tests,

17

- A. Yes. I was still waiting for the workup to be 18 completed at that time, yes. 19
- 20 Q. Right.
- 21 And it hadn't been completed as of February 22 of 2019 as far as you know, correct?
- 23 A. Well, from what I --
- 24 Q. Doctor, my question is -- let me strike that. My 25 question's bad.

- 16 also fixed his urinary bladder.
- 17 And it says here, can you read that for me?
- 18 A. He now has no issues.
- 19 Q. All right. And he didn't have any issues when you saw
- 20 him last on January 10th, 2017, with respect to the
- 21 functioning of his colostomy, correct?
- 22 A. Yes, sir.
- 23 Q. Am I correct in that?
- 24 A. Yes, sir, you are correct.
- 25 Q. And he didn't have any issues on June --

hansonreporting.com 313.567.8100

Pages 54..57

1 A. I'm sorry. I didn't get that last part.

2 Q. And he also didn't have any issues, at least according

4 A. As per -

5

7

8

MR. OSWALD: Objection with respect to it's calling Doctor Kansakar to testify regarding another doctor's note. She didn't treat.

9 MR. SCARBER: Okay. No speaking 10 objections.

10 objections.

What's your objection?

12 MR. OSWALD: That it's not within her

13 knowledge of what the note was at that time.

14 MR. SCARBER: So calls for speculation and

15 foundation. I got it.

16 BY MR. SCARBER:

17 Q. Per this note, this note is dated surgery as June

18 19th, 2019, correct?

19 A. Yes, sir.

20 Q. And in this particular note, I just read it to you,

21 it's highlighted here, he has no issues, correct?

22 A. Yes, it's written as he has no issues.

23 Q. Okay. Now, we talked about complications and medical

24 risks associated with surgeries, particularly your

25 first colostomy -- I'm sorry -- your initial colostomy

Page 55

1 surgery as well as a reversal surgery.

I want to take you to a document that was

3 filed with the court by the plaintiffs in this

4 particular case, and this is a document called

5 UpToDate.

2

6 And you're familiar with UpToDate?

7 A. Yes, I am.

8 Q. And this document was filed as ECF number 12-6, page

9 ID 227.

10 And it indicates -- can you read this to

11 yourself here, what's highlighted?

12 A. Subsequent closure of the colostomy is a technically

13 difficult operation associated with higher -- this is

14 kind of hidden here.

15 Could you move the screen? It's kind of

16 hidden behind the --

17 Q. Oh, I'm sorry.

18 MR. CORBET: You might want to scroll down

19 so it will be at the bottom margin.

20 THE WITNESS: I'm just going to move my

21 screen a little bit.

22 BY MR. SCARBER:

23 Q. Are you having difficulty reading it?

24 A. The videos are kind of blocking the text.

25 Q. How about, how about there, better?

1 A. Thank you.

2 Q. Okay.

3 A. It says: Subsequent closure of the colostomy is a

4 technically difficult operation associated with high

5 morbidity and mortality rates. As a result, colostomy

6 closure is only performed in approximately fifty to

7 sixty percent of all patients after a Hartmann

8 procedure.

9 Q. And you did a Hartmann's procedure, correct?

10 A. Yes, sir, I did.

11 Q. And how about this one that I'm going to show you

12 here, starting here.

13 A. In a retrospective administrative database study of

14 sixteen sixty patients who underwent Hartmann

15 procedure for diverticulitis, only twenty-eight point

16 three percent underwent colostomy reversal within a

17 year. Outcomes of the reversal surgery were not

18 influenced by the time lapse from the index operation.

19 The optimal timing of colostomy reversal remains

20 undefined and at the discretion of the surgeon.

21 Q. Now, you don't disagree with that medical literature,

22 do you?

23 A. No, I do not disagree, but, again, it's quoted only

one study, so I do not know if that's, like, that's

25 the - I'm sure there are other studies kind of giving

Page 57

1 more information. So it looks like one study there,

and it references --

3 Q. It actually quotes about three studies.

4 A. I see.

2

5 Q. Each one of these items here is a particular study.

6 Let me go down. So we've got 21, 22, 23, and 24.

7 Hang on a minute. Let me see if I can go down it.

Well, let me just ask you this to save some time here. What this basically says, these different

10 studies that it's talking about, is basically saying

that there can be differences of opinion, differences

12 of opinions amongst doctors regarding colostomy

13 reversal, right, whether we do it, the timing of when

14 it can be done, things like that, correct?

15 A. Yes, sir.

16 Q. And you don't disagree with that, right?

17 A. No, I do not disagree with that.

18 Q. Okay.

19 A. Could I take another break?

20 Q. Yes.

22

21 A. Thank you. For five minutes, please?

THE VIDEOGRAPHER: We're going off the

23 record at 2:35 p.m.

24 (Off the record at 2:35 p.m.)

25 (Back on the record at 2:44 p.m.)

1

Pages 58..61

- 1 THE VIDEOGRAPHER: We are back on the 2 record at 2:44 p.m.
- 3 BY MR. SCARBER:
- 4 Q. Doctor, just to follow up with you regarding what we
- 5 were talking about when we last left off, here are
- 6 some of those articles that were filed or that were
- 7 referenced in a court filing.
 - Are you able to see my screen?
- 9 A. Yes, sir.

8

- 10 Q. Okay. One of the articles being What Proportion of
- 11 Patients with an Ostomy for Diverticulitis Get
- 12 Reversed, another one being Restoration of Bowel
- 13 Continuity After Surgery for Acute Perforated
- 14 Diverticulitis: Should Hartmann's Procedure be
- 15 Considered a One-Stage Procedure, Feasibility and
- 16 Morbidity of Reversal of Hartmann's, so Avoiding or
- 17 Reversing Hartmann's Procedures.
- 18 So there's a number of articles that would
- 19 seem to indicate that it's certainly within a
- 20 particular medical provider's medical judgment as to
- 21 what they are going to do or what they think is
- 22 appropriate for a particular patient, correct?
- 23 A. Correct, sir.
- 24 Q. And you don't disagree with that, right?
- 25 A. I do not disagree with that.
- Page 59
- 1 Q. When you're going to do a reversal, essentially what
- you're trying to do is alter or adjust the patient's 2
- 3 body or their body structure, right, back to what it
- 4 was, correct?
- 5 A. Yes, sir.
- 6 Q. I mean, you're trying to put a patient back in some
- 7 kind of original way, correct?
- 8 A. Correct. The goal is to establish the natural 9 continuity.
- 10 Q. And it's reconstructive in the sense that you're
- 11 trying to reform the body structure back to how it was
- 12 previously in terms of what you indicated in terms of
- 13 how to have their waste excreted in the original way,
- 14 correct?
- 15 A. Yes, sir.
- 16 MR. SCARBER: Doctor Kansakar, I don't 17 think I have anything further. I want to thank you
- 18 for your time.
- 19 THE WITNESS: Thank you, sir.
- 20 MR. CROSS: I have a little bit of
- 21 redirect.
- 22 REEXAMINATION BY MR. CROSS:
- 23 Q. Doctor Kansakar, I believe you --
- 24 MR. CORBET: Is anybody else there, Ian? I 25 thought we ought to identify everybody in the room.

- MR. CROSS: Yes. Larry Margolis is here.
- 2 MR. MARGOLIS: Good afternoon, people. I
- 3 identified myself with the court reporter. I
- 4 apologize if I didn't let you know. Mr. Margolis,
- Larry Margolis.
- 6 BY MR. CROSS:
- 7 Q. Doctor Kansakar, I believe you testified about some
- risks that are associated with the procedure to place
- 9 the ostomy, is that correct?
- 10 A. Could you, could you reframe the question again?
- 11 Q. Are there risks associated with the Hartmann's
- 12 procedure?
- 13 A. Yes, there are.
- 14 Q. Are there risks associated with a colostomy takedown?
- 15 A. Yes, there are.
- 16 Q. Are there risks associated with every surgical
- 17 procedure that involves general anesthesia?
- 18 A. Yes, there are.
- 19 Q. Do you recommend a surgery when you believe the risks
- of the surgery outweigh the benefits to the patient? 20
- 21 A. No, I do not.
- 22 MR. SCARBER: I'm just going to place an
- 23 objection to relevance and foundation.
- 24 BY MR. CROSS:
- 25 Q. I believe you testified before that you performed
- perhaps a hundred ostomy placements in your career? 1
- 2 A. That's a rough estimate. I do not know the exact
- 3 number.
- 4 Q. And did you testify that Mr. Jackson was thirty-four
- years old at the time you placed his ostomy?
- 6 A. I believe as per his date of birth which is 2-5, 1982,
- he would have been thirty-four years old at that time.
- 8 Q. And I believe you testified he had no other medical
- complications that would make reversal especially
- 10 difficult or contraindicated, is that correct? 11
- MR. SCARBER: I'm just going to place an
- objection to asked and answered and leading. 12
- 13 BY MR. CROSS:
- 14 Q. You may answer.
- 15 A. The patient did not have any other medical
- comorbidities that would make him high risk for 16
- 17 colostomy reversal.
- 18 Q. Do many of the patients you have placed an ostomy in
- 19 have comorbidities?
- 20 A. Some patients do have comorbidities.
- I'm sorry. Sorry about that. 21
- 22 Q. How does Mr. Jackson's age compare to the ages of most
- 23 of the patients you perform this procedure on?
- 24 MR. SCARBER: I'm just going to place an
- 25 objection now to outside, completely outside the scope

Pages 62..65 Page 64

- 1 of my redirect, my direct or my redirect as well as
- 2 Mr. Corbet's.
- 3 MR. CORBET: Join.
- 4 BY MR. CROSS:
- 5 Q. Go ahead.
- 6 A. So generally diverticulitis is a condition in older
- 7 age group, usually sixty or higher age group. He is a
- 8 younger individual getting this condition at age
- 9 thirty-four.
- 10 Q. So would it be fair to say that most of the
- 11 individuals you placed an ostomy in are older and
- 12 sicker than Mr. Jackson?
- 13 A. Yes.
- 14 MR. SCARBER: Foundation.
- 15 BY MR. CROSS:
- 16 Q. Okay. Go ahead.
- 17 A. Sorry. So generally they are older patients than
- 18 Mr. Jackson, not necessarily always sicker.
- 19 Q. Okay. And is it more difficult to reverse a colostomy
- 20 in an older patient typically?
- 21 A. I do not think technically it is a difficult procedure
- 22 to reverse the ostomy in an older individual.
- 23 However, in an older individual, they do
- 24 have -- they do tend to have more medical
- 25 comorbidities like a heart condition or a lung
 - Page 63
- 1 condition which can be challenging for the
- 2 postoperative or intraoperative care.
- 3 Q. And does that render the procedure higher risk?
- 4 A. Yes, it can be a higher risk to perform based uponother medical comorbidities of the patient.
- 6 MR. CROSS: Okay. I don't have further
- 7 questions. Thank you for your time, Doctor Kansakar.
- 8 THE WITNESS: Thank you, sir.
- 9 REEXAMINATION BY MR. CORBET:
- 10 Q. Doctor, I just have a little bit of follow-up. This
- 11 is Dan Corbet again. Just some housekeeping.
- 12 I don't know if I identified the April 7th
- 13 jail note as an exhibit, but if I didn't, it's
- 14 Defendants' Exhibit 3.
- 15 And then just, Doctor, you don't have any
- 16 personal recollection of talking to the jail nurse,
- 17 Colleen, or any other jail or prison personnel about
- 18 reversing the colostomy, do you?
- 19 A. I do not have any recollection of talking to any other
- 20 individual in person. I am just referring to my
- 21 medical notes at this time.
- 22 Q. Right.
- 23 And I didn't see any notes that you
- 24 personally talked to anybody at the jail regarding
- 25 reversing the -- the jail or the prison regarding

- 1 reversing the colostomy, is that fair?
- 2 A. I do not see any note in person, but, again, this
- 3 letter says to whom it may concern. I'm not sure
- 4 where it was faxed to. From what was shown earlier,
- 5 it was faxed to Colleen, but that's about it.
- 6 Q. Okay. And did you participate -- well, strike that.
- 7 I showed you several notes from the jail
- 8 and prison about where it was noted that discussions
- 9 were held with your office -- in one particular case,
- 10 Kathy -- about reversing the colostomy.
- Do you remember me showing you those notes?
- 12 A. Yes, sir.
- 13 Q. Okay. You don't know if Kathy told the jail or the
- 14 prison nurses or personnel that this was medically
- 15 necessary or not, do you?
- 16 A. I do not know that. From what I recall and referring
- 17 back to my notes, you know, the letter states that,
- 18 you know, this is what I would recommend for him, and
- 19 Kathy at that time being my office manager would have
- 20 taken the lead on the communication part.
- 21 Q. Right.
- 22 And the letter that you're talking about,
- 23 that's dated January 24th, correct?
- 24 A. Yes, sir.
- 25 Q. And the conversation that I talked -- that I showed
 - Page 65
- 1 you in the jail note is dated February 1, about a week
- 2 later, a little more than a week later, correct?
- 3 A. Yes. I believe that was the date, but I currently
- 4 don't have access to that note.
- 5 Q. Okay. You can take my word for it. Exhibit --
- 6 defendants' exhibit does show that it's February 1,
- 7 2017. But nowhere in that note -- well, strike that.
- 8 That note suggests that someone at the
- 9 jail -- namely, Nurse Colleen -- spoke with your
- 10 office manager, Kathy, correct?
- 11 A. Yes.

- MR. CORBET: Thank you. That's all I have.
- 13 THE WITNESS: Thank you.
- 14 REEXAMINATION BY MR. SCARBER:
- 15 Q. Doctor Kansakar, just a couple follow-up questions.
- 16 First question. When you were advising
- 17 Mr. Jackson about the risks and potential
- 18 complications of these procedures, you didn't tell him
- 19 you're young, so these things aren't going to happen
- 20 to you, did you?
- 21 A. I'm sorry. These things refer to --
- 22 Q. I'm sorry. When you were -- let me rephrase my
- 23 question, and let me be a little more specific.
- 24 That's my fault.
- 25 When you were discussing the risks and

Erina Kansakar 03/05/2021 Page 66

Pages 66..69

	Page 66		Page 68
1	potential complications of this procedure with	1	A. I think it's page number 91.
2	Mr. Jackson, you didn't tell him, oh, by the way,	2	Q. Can you hold it up to your camera because I think
3	you're young, so you don't have a risk of infection,	3	we've all got different notes here.
4	you don't have a risk for potential need for	4	All right. Let's take a quick break, and
5	reoperation, you don't have a risk for potential	5	I'll wrap this up. I don't want to waste your time
6	leakage or damage to the surrounding structures	6	while I'm looking at it on my computer, so let's just
7	including the ureter. You didn't tell him that he was	7	take a pause for the cause for a second.
8	at any less risk than anybody else, did you?	8	THE VIDEOGRAPHER: We're going off the
9 A	. No, I did not tell him that he was at any risk. I	9	record at 3:00 p.m.
10	don't think that would at least in my note, I don't	10	(Off the record at 3:00 p.m.)
11	mention that, and I do not recollect.	11	(Back on the record at 3:03 p.m.)
12 (). Right.	12	THE VIDEOGRAPHER: We are back on the
13	And I think you said any risk, but you	13	record at 3:03 p.m.
14	didn't tell him that he was at any less of a risk than	14	
15	any other person, did you?	15	
16 A	. Again, that's - that depends upon every patient and	16	
17	their risk factors. It would be hard to compare him	17	I would note that we do reserve the right
18	against an eighty-year-old with a lot of other	18	
19	comorbidities. So I don't know if this is less in	19	
20	terms of somebody who is eighty versus somebody who is	20	
21	fifty.	21	
22	Again, looking at his history, he did not	22	MR. CORBET: I'm sorry. Thank you, Doctor.
23	have any other medical comorbidities, so I would	23	
24	assume the risks would be less, but, again, there	24	
25	could still be complications like bleeding which is	25	
200	Page 67		Page 69
1	20 (2.5)		might have the same set of records, so, Ian, we'll
	Page 67		Page 69
	Page 67 not an age-related factor or age-related complication.		might have the same set of records, so, Ian, we'll
2 Q	not an age-related factor or age-related complication. And I think you might have answered my question, but	2	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using
2 Q 3	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way.	2	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of
2 Q 3 4	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks	2 3 4	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff.
2 Q 3 4 5	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks and complications of this potential procedure, you	2 3 4 5	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff. But the records I referenced I tried to
2 Q 3 4 5 6	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks and complications of this potential procedure, you didn't tell him when you were explaining this stuff to	2 3 4 5 6	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff. But the records I referenced I tried to identify and I think I did on the record, so, but if I
2 Q 3 4 5 6 7	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks and complications of this potential procedure, you didn't tell him when you were explaining this stuff to him that you're only thirty-four years old or you're	2 3 4 5 6 7	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff. But the records I referenced I tried to identify and I think I did on the record, so, but if I need to go back and fix that, you know, I will. But hopefully everything is identified properly in the transcript.
2 Q 3 4 5 6 7 8	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks and complications of this potential procedure, you didn't tell him when you were explaining this stuff to him that you're only thirty-four years old or you're only you're just over thirty, so don't worry about	2 3 4 5 6 7 8	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff. But the records I referenced I tried to identify and I think I did on the record, so, but if I need to go back and fix that, you know, I will. But hopefully everything is identified properly in the transcript.
2 Q 3 4 5 6 7 8 9	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks and complications of this potential procedure, you didn't tell him when you were explaining this stuff to him that you're only thirty-four years old or you're only you're just over thirty, so don't worry about it. You told him these risks because these risks can	2 3 4 5 6 7 8 9	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff. But the records I referenced I tried to identify and I think I did on the record, so, but if I need to go back and fix that, you know, I will. But hopefully everything is identified properly in the transcript. MR. CROSS: Sure, no problem.
2 Q 3 4 5 6 7 8 9	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks and complications of this potential procedure, you didn't tell him when you were explaining this stuff to him that you're only thirty-four years old or you're only you're just over thirty, so don't worry about it. You told him these risks because these risks can happen, correct?	2 3 4 5 6 7 8 9 10	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff. But the records I referenced I tried to identify and I think I did on the record, so, but if I need to go back and fix that, you know, I will. But hopefully everything is identified properly in the transcript. MR. CROSS: Sure, no problem. I don't have any further questions, either.
2 Q 3 4 5 6 7 8 9 10 11 A	not an age-related factor or age-related complication. And I think you might have answered my question, but let me just ask it in a more defined way. When you were explaining to him the risks and complications of this potential procedure, you didn't tell him when you were explaining this stuff to him that you're only thirty-four years old or you're only you're just over thirty, so don't worry about it. You told him these risks because these risks can happen, correct? A. I don't believe I told him that just because of his	2 3 4 5 6 7 8 9 10 11	might have the same set of records, so, Ian, we'll have to figure out I guess if we're going to be using the same set, same page numbers and all that kind of stuff.
